Summary

An enthusiastic Computer Science and Engineering undergraduate at the University of Moratuwa with a solid background in core programming concepts and experience in full-stack web development. Academic interests include software engineering and system design, with an emphasis on practical application and continuous learning. Looking to gain experience that bridges academic knowledge with real-world problem solving.

Areas of Interest

Software Development (Front-end & Back-end)
Machine Learning
DevOps & CI/CD Automation

Education

University of Moratuwa *May 2026 – Present*
B.Sc. Engineering (Hons.) in Computer Science & Engineering
– **CGPA:** 3.9 / 4.0
Dean's List: Semester 1

A/Kekirawa Central College *2015 - 2023*
G.C.E. Advanced Level, Physical Science Stream
– Combined Mathematics – A, Physics – A, Chemistry – A
Z-Score: 2.2389

Projects

Personal Portfolio Website *Jan 2026 – Present*
🔗 GitHub — 🔗 Demo
– Engineered a sleek, responsive portfolio with glassmorphic design and smooth animations to showcase my software engineering background and technical projects.
– Integrated automated contact form transmission workflows using Web3Forms and optimized asset delivery with Vite.
– **Tech Stack:** React.js, Tailwind CSS, Lucide Icons, Vite, Web3Forms

Govi Gnana (Crop Price Predictor)

Jan 2026 – Present

 [GitHub](#) —  [Demo](#)

- Built an AI-powered agricultural market insights and crop price forecasting platform tailored for Sri Lankan markets.
- Developed an automated data ingestion pipeline scraping CBSL reports, PDF table extraction, and a LangGraph multi-agent orchestration workflow to analyze historical price trends.
- **Tech Stack:** LangGraph, Python, Streamlit, Pandas, GitHub Actions, Groq API

SAMS (School Administration and Management System)

Oct 2025 – Dec 2025

 [GitHub](#) —  [Demo](#)

- Served as Backend & Database Lead in a collaborative group project, engineering the robust multi-user backend structure and API endpoints.
- Designed the relational database schema and implemented secure role-based authentication flows to streamline high school administrative bottlenecks.
- **Tech Stack:** React.js, Django REST Framework, Sqlite3, Tailwind CSS

Learning Management System (LMS-CMS)

May 2026 – Present

 [GitHub](#)

- Architected a modular Django REST Framework and React ecosystem featuring a polymorphic appeal system via GenericForeignKeys, batch student enrollment with automated ID generation, and role-based JWT session security.
- Optimized database query aggregation, reducing dashboard endpoint loads by 66% using Django aggregation techniques.
- **Tech Stack:** React.js, Django REST Framework, Polymorphic Architecture, Sqlite3

Core Skills

Web Development: HTML, CSS, React, Tailwind CSS, UI Libraries (Material UI)

Database Management: Sqlite3

Version Control: Git, GitHub

Programming Languages: C, C++, Python, Java, JavaScript

Deployment: Render, Vercel, Streamlit Cloud

Tools: VS Code, IntelliJ IDEA, Xilinx Vivado

Soft Skills

- Effective communication and teamwork skills gained through group projects and collaborations.
- Adaptability and quick learning ability in adopting new technologies and methodologies.
- Time management and organizational skills developed through balancing academic and project commitments.
- Open to feedback and use it as a way to grow and improve.

Honors & Awards

Dean's List - University of Moratuwa
Awarded for academic excellence in Semester 1.

2025 - present
